

FAB-FORM
1st QUARTER
2006

REPORT TO OUR SHAREHOLDERS

Continuing Innovation

On the cover of this report is a photo of Brian Strachan, a large forming contractor in Surrey BC, prototype-testing the new Fastfoot® Mini™. This 120' roll of forming fabric replaces dimensional lumber up to 12" in height and is **seventeen times** less expensive. The Mini™ minimizes labor by eliminating the sawing, nailing and stripping of lumber. The Fastfoot® Mini™ is being introduced into our local market during this quarter.

We are also introducing precut 12' lengths of Fast-Tube™ to compete directly in length and price with cardboard tubes.

I heartily thank our Board Members, Shareholders, Dealers and Contractors for their continued enthusiasm and commitment to our revolutionary concrete forming technology.

Sincerely

Richard Fearn

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The accompanying consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles. The financial information contained elsewhere in this report has been reviewed to ensure consistency with the financial statements.

Management maintains systems of internal control designed to provide reasonable assurance that the assets are safe guarded. All transactions are authorized and duly recorded, and financial records are properly maintained to facilitate financial statements in a timely manner. The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the financial statements. The Board carries out this responsibility principally through its Audit Committee.

The Audit Committee of the Board of Directors has reviewed the financial statements with management. Culver & Co., an independent firm of chartered accountants, appointed as external auditors by the shareholders, have not audited the consolidated financial statements.

NOTES TO FINANCIAL STATEMENTS

31 March 2006

1. Future operations

These financial statements have been prepared on a going concern basis, which presumes the recovery of assets and settlement of liabilities at their carrying values in the normal course of business for the foreseeable future. Continued operations and the recovery of carrying value of property, plant and equipment, deferred development, patent and trademark costs are dependent on the company's ability to continue product development, generate net income and positive cash flows on a commercial scale.

If the going concern assumption was not appropriate for these financial statements adjustments would be necessary to the carrying values of assets and liabilities. At 31 March 2006 the Company had working capital of \$30,383 (2005 – negative \$94,938) and a deficit of \$408,449 (2005 - \$443,928).

2. Incorporation and nature of business

Fab-Form Industries Ltd. (the "company" or "Fab-Form") was incorporated 13 June 1995 under the Company Act of British Columbia as 498620 BC Ltd. On 11 October 1995 the company changed its name to Capital Gold Corporation. On 16 November 1995 the company changed its name to First Gold Corporation. On 25 October 1999 the company changed its name to Fastfoot Industries Ltd. On 14 December 2001 the company changed its name to Fab-Form Industries Ltd.

In 1999 the company acquired 100% of the issued and outstanding shares of Maxito Industries Ltd. ("Maxito"). Maxito develops proprietary technology to construct concrete footings, foundations, and walls for residential and commercial building structures. Maxito's wholly owned subsidiary, Fab-Form Industries (1986) Ltd. ("Fab-Form (1986)") is the operating company for the technology.

3. Significant accounting policies

a) Consolidation

These consolidated financial statements include the accounts of the company, its wholly owned subsidiary Maxito, and the wholly owned subsidiary of Maxito, Fab-Form Industries (1986) Ltd.

b) Inventory

Inventory is valued at the lower of cost or net realizable value. Cost is determined on the first-in, first-out basis.

c) Amortization

The company provides for amortization of property, plant and equipment on the declining balance basis using the following annual rates:

- Manufacturing equipment - 20%
- Office furniture and equipment - 20%
- Computer equipment - 30%
- Vehicle - 30%
- Software - 100%

One-half of the above rates are taken in the year of acquisition. No amortization is taken on equipment under development.

d) Patents

Expenditures relating to patents are recorded at cost and are amortized on a straight-line basis over 17 years, commencing in the year in which the patent certificate is received.

NOTES TO FINANCIAL STATEMENTS

31 March 2006

e) Deferred development costs

New product research and development costs are deferred to future periods when the product or process is clearly defined, the costs can be identified, the technical feasibility has been established, management intends to market the product or process, a market exists for the product or process, and adequate resources exist, or are expected to be available, to complete the project. Research, as well as development costs that do not meet the preceding criteria are expensed in the period incurred.

The company provides for amortization using the reversed sum-of-the-years'-digits method, over the estimated useful life of the product or process from the date the product is sold commercially.

Research and development investment tax credits and government grants are applied against the deferred costs or expense, as applicable, in the period in which the investment tax credits and government grants are received.

Deferred development costs include:

- i) direct costs of materials and services consumed during the development stage,
- ii) remuneration of personnel directly engaged in the development activities,
- iii) a reasonable portion of overhead costs,
- iv) amortization of capital assets used in the development activities.

f) Trademarks

Trademarks are recorded at cost and are amortized on a straight-line basis over 10 years, commencing in the year in which the trademark certificate is received.

g) Foreign currency translation

The company's foreign denominated transactions have been translated into Canadian dollars as follows:

- Monetary assets and liabilities at year-end rates,
- All other assets and liabilities at historical rates, and
- Revenue and expense and research and development items at the average rate of exchange prevailing during the year.

Exchange gains and losses arising from these transactions are reflected in income or expense in the year.

h) Income taxes

Income taxes are accounted for using the asset and liability method. Under this method, future income tax assets and liabilities are determined based on temporary differences between the financial statement carrying amount and tax bases of assets and liabilities, and measured using the substantively enacted tax rates and laws that will be in effect when the differences are expected to reverse. The effect on future income tax assets and liabilities from a change in tax rates is included in income in the period that includes the substantive enactment date. Future income tax assets are evaluated periodically and if realization is not considered more likely than not, a valuation allowance is provided.

As at 31 December 2005, the Company has recorded a valuation allowance to reduce the future income tax asset to \$nil, as the Company has not met the "more likely than not" criteria in respect of recovery of future income taxes.

i) Stock-based compensation

The company adopted prospectively in 2003 the recommendations of the Canadian Institute of Chartered Accountants for stock-based compensation. The recommendations are applicable only to awards granted by the company after the date of adoption. No compensation expense relating to options was recorded during the year. Any consideration paid on the exercise of stock options is credited to share capital. See note 13 (d).

j) Revenue recognition

Revenue is recorded and related costs are recognized at the time the product is shipped, the title to the goods has passed, and collection is reasonably assured.

k) Earnings per share

Basic earnings and loss per share are calculated using the weighted average number of common shares outstanding during the year. Diluted earnings per share is calculated using the treasury stock method and reflects the potential dilution of securities by including stock options in the weighted average number of shares outstanding, if dilutive.

FIRST QUARTER CONSOLIDATED FINANCIAL STATEMENTS

NOTES TO FINANCIAL STATEMENTS

31 March 2006

l) Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates.

4. Financial instruments

The company's financial instruments consist of accounts receivable, accounts payable, amounts due to related parties, loans from related parties and long-term debt. Unless otherwise noted, it is management's opinion that the company is not exposed to significant interest, currency or credit risks arising from the financial instruments. The fair value of these financial instruments approximates their carrying value due to their short-term maturity or capacity of prompt liquidation. As a significant portion of the company's sales is made in US funds, there is significant exposure to the foreign currency fluctuation risk.

i) The company amortizes the Fastfoot® (started in 2000) and Fast-Tube™ (started in 2004) technology using a reversed sum-of-the-years'-digits method over seven years.

ii) No amortization of Fabwall™ has been recorded as this project is still under development. No material revenue has resulted from this technology.

7. Patents

The company has an exclusive license agreement with its majority shareholder for use of proprietary technology protected by a number of current and pending patents for the life of the patents. No license fees are payable under the agreement except for the costs to register and maintain the patents. Costs and amortization of held patents are as follows:

12. Obligation to issue shares / contingent liability

During the 2000 fiscal year, a former director and officer of the parent company ("the plaintiff") initiated legal action against the company. The plaintiff alleges that during the 2000 fiscal year he made \$64,500 in loans to the company, and that the company owes him this money plus accrued interest. The company's current management believes that only \$63,500 was advanced to the company and that these funds were advanced for the exercise of warrants. No further legal action has been undertaken by the plaintiff or the company since fiscal 2000. The outcome of the dispute is still unknown.

13. Share capital

a) Basis of presentation

These consolidated financial statements are prepared using reverse takeover accounting, under which the capital structure of the consolidated entity is that of the legal parent (the company), but the dollar amount at the date of the reverse takeover of the issued share capital is that of the legal subsidiary (Maxito).

b) Details of share capital

- i) Authorized: 100,000,000 common shares without par value and 100,000,000 class A preferred shares without par value
- ii) Issued:

<i>Common shares</i>	<i>Quantity</i>	<i>Amount</i>
Balance – 31 December 2003 and 2004	6,318,116	\$ 613,674
Private placement – 2 June 2005	489,176	78,268
Balance – 31 March 2006	6,807,292	\$ 691,942

As at 31 March 2006, 55.9% (2005 – 55.9%) of the issued and outstanding voting common shares of the company were owned by a director and officer of the company and a relative of the director and officer.

c) Escrow shares

As at 31 March 2006:

- i) As a result of the 1999 reverse takeover, 3,419,307 (2004 - 3,419,307) shares were held in escrow to be released for every \$1.014 of cumulative positive cash flow before tax. The release of escrow shares must be made before 30 June 2009.

d) Options and warrants

There are no warrants or options outstanding.

14. Related party transactions

The following related party transactions occurred during the fiscal quarter:

<i>Category</i>	<i>Description</i>	<i>Year</i>	<i>Director & Officer</i>	<i>Relative of a Director & Officer</i>	<i>Director or Company Controlled by Director</i>

FIRST QUARTER CONSOLIDATED FINANCIAL STATEMENTS

NOTES TO FINANCIAL STATEMENTS

31 March 2006

15. Income taxes

There is no income tax payable on the current year's income as a result of the application of prior year's losses. The company and its subsidiaries have available non-capital losses for tax purposes of approximately \$342,000, which may be carried forward and used to reduce taxable income of future years. These losses expire as follows:

2007	130,000
2008	76,000
2009	3,000
2010	57,000
2011	12,000
2012	3,000
<u>Total</u>	<u>\$ 342,000</u>

Timing differences between accounting and tax values of property and intangible assets of \$78,000 will be offset against these losses in future years.

The company claims tax credits under the Scientific Research and Experimental Development investment tax credit program ("SR&D ITC"). SR&D ITC credits of \$40,000 are available to offset future income taxes.

Due to the uncertainty of future recovery, the potential tax benefit of these items has not been recognized in these consolidated financial statements.
