

FASTBAG®

"The Footing-in-a-Bag"
Cut forming costs 75%

ENGINEER APPROVED

Benefits

- Fast - installs in seconds
- Easy - no lumber, no stakes, no tools
- Flexible - adapts to uneven ground
- Light - carry in your pocket
- Saves - time and concrete (no leakage)
- Simple - install with unskilled labor

"Fastbags® save us lots of time and money. We've bought thousands of bags and saved thousands of dollars. They're the greatest thing to happen to forming since sliced bread."

Mark Markovitch, President, Dependant Foundations, MI

Installation

- 1 Lay the Fastbag® on the ground and drive a small stake through the center to act as a screed stake. Use a zippered bag if reinforcing is required.
- 2 Fill the Fastbag® with concrete - no stripping required.
